# Summer Courses 2011 for engineering students

Contact: Ms. Nerea Olazabal  
[summerschool@tecnun.es](mailto:summerschool@tecnun.es)

## Dear Partner,

TECNUN, the School of Engineering of University of Navarra is the 4th oldest Engineering School in Spain and is ranked as the No. 1 private school of Engineering in Spain. (Reference: Ranking No. 1 published by the Spanish Newspaper "El Mundo").

This year, TECNUN International Summer School offers a two week summer program for international engineering students. The main purpose is to teach and enrich the students with both theoretical and practical aspects of Engineering while enjoying one of the most beautiful cities in Europe (The Times, The 20 hottest European Beaches for 2010, January 2010). The students will also have the opportunity to experience the Basque Culture and Society through a leisure program organized by TECNUN.

The program is also recommended for students who are thinking about TECNUN as a possible Study Abroad destination but would like to get to know the university and the city beforehand.

We are looking forward to meeting you this summer.

Yours sincerely,

**Javier Ganuza**

Director of International Relations Service

## TECNUN Summer School Courses

Each summer TECNUN offers a wide variety of courses taught in English and Spanish. Below find listing for courses presently confirmed\*:

- Introduction to microrobotics
- Design and optimization of hybrid power systems with HOMER
- From Local to Global
- Moving from PUSH to PULL systems
- Professional and Personal Development through Decision-making
- An Introduction to Cardiovascular Fluid Mechanics
- Introduction to Systems Thinking
- Communicate with Impact
- Fundamentals of Medical Imaging
- Business Spanish Course
- Oportunidades en empresas de tecnología social

\*Please check the website for updates.

All the courses require a minimum number of students to be offered.

## Why TECNUN-University?

It is ranked as the No.1 private school of engineering in Spain according to the National Rankings (published by the Spanish Newspaper "El Mundo").

San Sebastián is a stunning seaside coastal location.

Students will experience a different culture while studying in an international environment.

Students will learn new technical and general concepts to aid career development.

Students will combine studies with social activities.

## Prospective students

TECNUN Summer School welcomes:

- International students in summer studies at TECNUN.
- TECNUN students.

## Tuition fees

There is a reduced fee of 130 € for students of our partner institutions.

Students from non-partner universities fees set at 180 €.

There is a once off tuition fee and this entitles participants to take multiple courses and covers all extracurricular activities. Please consult our website.

## Courses period

- From the 27th of June to the 1st of July.
- From the 4th to the 8th of July.

For further course details, consult our website.

## ECTS credits

Each TECNUN Summer School Course has a ECTS load assigned.

## Company Visits

TECNUN Summer School Program offers visits to companies such as Gamesa, CAF or Volkswagen.

## Social Activities

The students will enjoy extracurricular activities while attending Summer School.

- Orientation City Tour.
- Surfing.
- Sailing.
- Tasting the internationally renowned gastronomy (pintxos).
- Introduction to the Basque Culture.

## Special Events

San Fermín: The famous bullrunning festival starting the 7th of July.

## Certificate

The students will be awarded with an official certificate on completion.

## Housing

TECNUN has prearranged accommodation in student residence halls at a convenient price. For extended information or options check on our home page.

## Scholarships

TECNUN will provide some scholarships for accommodation. You can find more information on our web page.

## Application

The application deadline is April 30th 2011. For details on the application form visit our website.
