Germany Hands-On is offered within the Junior Year/Exchange Program and runs parallel to the semester. Internships are usually carried out for about three months. Students work approximately two or three days a week at their internship placement. We recommend students who intend staying in Bonn for a year to participate in the program during the second semester and to use the first semester for improving academic skills and the German language. A program fee of 250 EUR is added to the regular university study abroad fees for the semester. Please do not hesitate to contact us if you have any questions about this program (gho@uni-bonn.de)!
