About Us

National Drug and Alcohol Research Centre (NDARC)

Background

Goals

Methodology

Results

Discussion

Background

Why refresh?

- Existing CMS tool requires a client and is hard use
- Existing website platform is hard to update to include new features
- Web refresh initially planned to be complete in 2010 but I decided to wait to see what was happening with the research gateway... sorry
- We lost momentum
- We have now been working on this project for 8 months

Goals

What did we set out to do?

- Refresh all key Medicine Websites in 2011
- Put a big spotlight on People and projects and re-use news
- Separate content and presentation layers
- Provide a development framework that is modular
- Leverage UNSW Data and Research Gateway profiles
- Embrace social media and user-generated content

Goals

A Spotlight on People and Projects

- Expands our surface area
- Promotes our superstars
- Exposes our projects

Re-use News and Events

- News and Event content useable across Faculty websites
- News content easy to move to Digital signage system

UNSW Research People & Projects People Professor Ross Bowen Harley

Professor Ross Bowen Harley

Field of research: Electronic Media Art
Campus: COFA
Tags: The creative arts, Internet Broadcasting, The Media, Film and Video Services (excl. Animation and Computer Generated Imagery)

Professor and Head of the School of Media Arts at the College of Fine Arts UNSW, Harley has an international reputation as a researcher and producer of new media. His work has been shown in international galleries, museums, festivals and television contexts (including NY MoMA, the Pompidou Centre, The New Museum NYC, Sydney Opera House, Ars Electronica and ISEA) and held in collections in Australia and abroad (Cinesound, Griffith Artworks, NY MoMA, VideoDataBank, ABC and SBS TV). In 1986 he curated the seminal Know Your Product for the Institute of Modern Art, Brisbane. This exhibition brought together recordings, videos, artworks, posters and fanzines from the burgeoning punk and post-punk scene in Brisbane. Urszula Szulakowska's book *Experimental Art in Queensland 1975-1995* claims that Know Your Product was "probably the most important exhibition mounted by the IMA".

From 1986-91 he was Managing Editor then Editor of the controversial art-theory journal *Art + Text* which was at the forefront of the postmodern debate, and had considerable impact upon the contemporary art scene in Australia. In 1992 he was the director of the influential International Symposium on Electronic Art, TISEA. According to Darren Tofts' *Interzone*, TISEA was "a singular, defining event in the history of media arts in Australia", bringing together international pioneers such as Myron Krueger, Char Davies, Ulrike Gabriel, David Blair and Luc Courschene with young Australian artists who have since become key figures in the development of media arts in Australia. Together with Peter Callas and Alessio Cavallaro, he produced and toured *An Eccentric Orbit: Electronic Media Art in Australia*. This was a large survey exhibition of Australian media art from the 1970s to 1990s commissioned by the American Federation of Arts and the Australian Film Commission 1994-96.

He has edited a number of anthologies on electronic media art practice and theory, including *New Media Technologies* (1993) and *Artists in Cyberculture* (1993). Two special issues of the British journal *Convergence* — *Before and After Cinema* (1999) *Parallel Histories in the Intermedia Age* (2000) — brought together articles on the relationship between early cinema and contemporary media. His own media projects utilise audio-visual technologies to creatively analyse the relationship between contemporary culture and technology. The release of *Aviopolis: A Book About Airports* (Fuller + Harley, 2004) together with the associated website, CD-ROM and DVD has firmly established his reputation as a leading new media researcher in the field of 'mobility studies'. Current research projects include "Video Art Online: from Ubu to Imperial Slacks" an ARC linkage investigating the history of video art in Sydney together with dLux Media Arts, the Museum of Contemporary Art Sydney, and video artist *John Gilmer*, and *Loomorama*, a collaborative installation project with Elvis Richardson based on personal archives of VHS tapes and VJ presentation tools.

UNSW THE UNIVERSITY OF NEW SOUTH WALES

Methodology

How are we going about it?

- Review what is being done with University and other Websites
- Choose which CMS tool to start working with
- Prototype using UNSW data from the Research Gateway
- Engage professional design firm to create two example templates
- Carry out a Pilot release and test integration and design
- Wider roll-out to all Faculty websites

Results

Review what is being done with
University and other Websites...

- Websites are much more People centric...
- There is more use of Social tools and User generated content...
- It is easier to re-use content to mash-up composite pages...
- Higher expectations that current content will be online...
- Websites will be accessed from a wide range of devices...

Results

Choose which CMS tool to start working with

- Wanted an Open-source CMS tool to avoid license fees
- Widely used by large and complex organisations comparable to UNSW Medicine
- With a large collection of modules already available
- Easily supportable by us or by the marketplace
- Selected: Drupal

Results

Drupal

- 7,888 Modules
- 947 Themes
- 4,265 Developers

Sites using Drupal

- White House
- The Economist
- UNSW Research Gateway

We're celebrating the launch of Drupal 7

Now easier to use, more flexible and more scalable, Drupal is an open source content management platform powering millions of websites and applications. [Learn more about Drupal 7](#)

Results

Prototype using UNSW data from the Research Gateway

- Research Gateway already has done a lot of work to clean up and access core UNSW data sources
- Data sources include: HR, InfoEd, ResPubs that we have wanted to use for a few years
- Almost there...
- We expect to use the Research Gateway people and project profiles in the Medicine Websites on release

Results

Engage professional design firm to create two example templates

- The refresh needed to deliver an updated design
- Wanted to have a couple of template options to show site owners
- Wanted a Sydney-based design firm which understood universities and Drupal
- Selected: Infinity
- Experience working with FBE
- NDARC template almost complete

Results

NDARC Template

- 9 Page types
- 6 core elements
- 30+ Modules

Page Types

- Home
- About Us
- News and Events
- People
- Projects
- Resources
- Search Results
- Staff Details
- Project Details

The screenshot displays the NDARC (National Drug & Alcohol Research Centre) website. At the top, the UNSW logo and NDARC name are visible. A navigation bar includes links for Home, Our Projects, Our People, Resources, and About Us, along with a search bar. The main content area features a 'Featured Resources' section with two entries: '20 DEC 2010 - Training Material' and '29 NOV 2010 - Journal'. Below this is a 'Find a Publication' search interface with filters for Author, Research Field, and Year, and a 'Publication Type' dropdown menu. The search results list several publications, including 'Adrenergic receptor activity suppresses ischaemia / reperfusion-induced Ins (1,4,5) P3 generation in the mouse heart: a comparison with ischaemic preconditioning', 'Comparative effects of levosimendan, OR-1896, OR-1855, dobutamine, and milrinone on vascular resistance, indexes of cardiac function, and O2 consumption in dogs', 'Substrate specificity of platypus venom L-to-D-peptide isomerase', and 'Containing a structural-maintenance-of-chromosomes hinge domain, has a critical role in X inactivation'. Each result includes a title, abstract, author list, and links to 'Full Text' or 'Endnote Reference'. On the right side, there are sections for 'Most Viewed', 'Most Downloaded', and 'Follow our Research', each with a list of publication titles. At the bottom right, there is a 'Popular Tags' section with terms like 'alcohol', 'drug', 'national', 'ndarc', 'research', 'study', 'system', 'wales', and 'unsw'.

Results

Carry out a Pilot release and test integration and design

- Working with NDARC to release pilot site in Q2
- Integration with Research Gateway data in progress
- Design sign-off likely this week
- Proceeding to template quotes asap for NDARC template
- Server and Database architecture in progress

Results

Wider roll-out to all Faculty websites

- Aim to have key Medicine Sites migrated by end of year
- Faculty Design in progress
- Deliver Faculty main site in Q3
- Profiles tool for people available via Research Gateway in April. Any updates made there will be used in Faculty profile.
- Other key sites from Q3 if no template/design changes required
- Professional templating service?

Discussion

What do you want to talk about?

- Do you want to see the page types currently completed for NDARC site?
- Do you want to talk about the Modules that will be available in the first release?
- Do you want to talk about using the Research Gateway to update People profiles?
- Do you want to talk about what you can be doing now to get your websites ready?
