National Drug & Alcohol Research Centre (NDARC)

The National Drug and Alcohol Research Centre (NDARC) was established at the University of New South Wales in May, 1986 and officially opened in November, 1987. It is funded by the Australian Government as part of the National Drug Strategy (formerly, the National Campaign Against Drug Abuse). NDARC is situated on the University of New South Wales Randwick campus in the eastern suburbs of Sydney. [More...](#)

What's new?

- Illicit drug use has increased and levels of risky alcohol use remain unchanged according to the 2010 National Drug Strategy Household Survey
- Read about Iran's first community clinic for female drug users, in the latest issue of CentreLines
- 2011 NDARC Annual Symposium - REGISTRATION NOW OPEN!
- 2011 National Drug Trends Conference - REGISTRATION NOW OPEN!

1. Look and Feel
2. Content
3. Communication

Look and Feel

What did we want

Project Brief

1. Look and Feel
2. Content
3. Communication

- Branding to reflect trust, professionalism and quality
- More contemporary, aesthetically appealing and user-friendly
- Reflect international status of NDARC

Make us look good!

Content

What did we want

Project Brief

1. Look and Feel
2. Content
3. Communication

- Relevant resources
- More accessible
- Clearly defined sections
- Easy to change and maintain
- Up to date

Our content is awesome! Show it off!!!

Communication

What did we want

Project Brief

1. Look and Feel
2. Content
3. Communication

- Promote research projects
- Improve Internal communication
- Information targeted to stakeholders
- Updated approach to media

Make it more .. You know.. useful

What did we do

THINKING

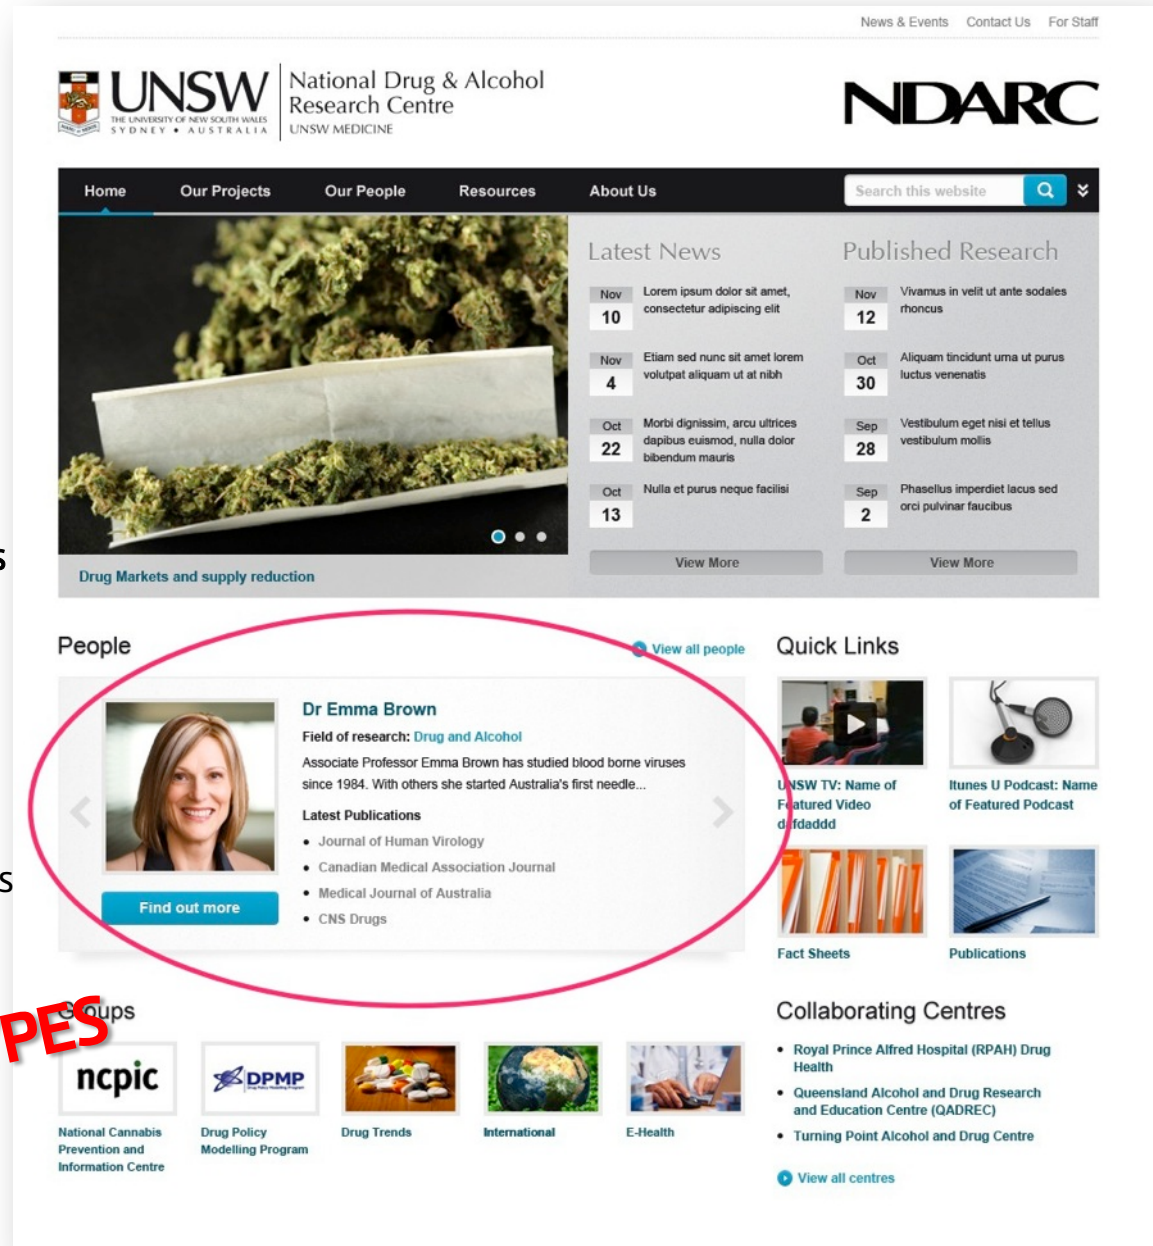

A Spotlight on People, Projects and Groups

- Expands our surface area
- Promotes our superstars
- Exposes our projects

Re-use News and Events

- News and Event content useable across Faculty websites
- News content easy to move to Digital signage system

DESIGN and CONTENT TYPES

What did we do

PLANNING

Separate Content and Presentation

- Easier to update the look and feel
- Easier to provide more templates

Modular open source framework

- Allows micro updates to sites
- Leverages community code
- Enables code re-use

A resource for the whole Faculty

UNSW > Research > People & Projects > People > Professor Ross Bowen Harley

Professor Ross Bowen Harley

Field of research: [Electronic Media Art](#)
Campus: [COFA](#)
Tags: The creative arts, Internet Broadcasting, The Media, Film and Video Services (excl. Animation and Computer Generated Imagery)

Professor and Head of the School of Media Arts at the College of Fine Arts UNSW, Harley has an international reputation as a researcher and producer of new media. His work has been shown in international galleries, museums, festivals and television contexts (including NY MoMA, the Pompidou Centre, The New Museum NYC, Sydney Opera House, Art Electronica and ISEA) and held in collections in Australia and abroad (Cinesound, Griffith Artworks, NY MoMA, VideoDataBank, ABC and SBS TV). In 1986 he curated the seminal Know Your Product for the Institute of Modern Art, Brisbane. This exhibition brought together recordings, videos, artworks, posters and fanzines from the burgeoning punk and post-punk scene in Brisbane. Urszula Szulakowska's book Experimental Art in Queensland 1975-1995 claims that Know Your Product was "probably the most important exhibition mounted by the IMA".

From 1986-91 he was Managing Editor then Editor of the controversial art-theory journal *Art + Text* which was at the forefront of the postmodern debate, and had considerable impact upon the contemporary art scene in Australia. In 1992 he was the director of the influential International Symposium on Electronic Art, TISEA. According to Darren Tofts' *Interzone*, TISEA was "a singular, defining event in the history of media arts in Australia", bringing together international pioneers such as Myron Krueger, Char Davies, Ulrike Gabriel, David Blair and Luc Courschene with young Australian artists who have since become key figures in the development of media arts in Australia. Together with Peter Callas and Alessio Cavallaro, he produced and toured *An Eccentric Orbit: Electronic Media Art in Australia*. This was a large survey exhibition of Australian media art from the 1970s to 1990s commissioned by the American Federation of Arts and the Australian Film Commission 1994-96.

He has edited a number of anthologies on electronic media art practice and theory, including *New Media Technologies* (1993) and *Artists in Cyberspace* (1993). Two special issues of the *British Journal of Contemporary Culture* — *Before and After Cinema* (1999) *Parallel Histories in the Intermedia Age* (2000) — brought together articles on the relationship between early cinema and contemporary media. His own media projects utilise audio-visual technologies to creatively analyse the relationship between contemporary culture and technology. The release of *Aviopolis: A Book About Airports* (Fuller + Harley, 2004) together with the associated website, CD-ROM and DVD has firmly established his reputation as a leading new media researcher in the field of 'mobility studies'. Current research projects include "Video Art Online: from Ubu to Imperial Slacks" an ARC linkage investigating the history of video art in Sydney together with dLux Media Arts, the Museum of Contemporary Art Sydney, and video artist John Gilmer, and *Zoomorama*, a collaborative installation project with Elvis Richardson based on personal archives of VHS tapes and VJ presentation tools.

DOING

NDARC Template Build

- 12 Page types
- 5 core database elements
- 30+ Modules

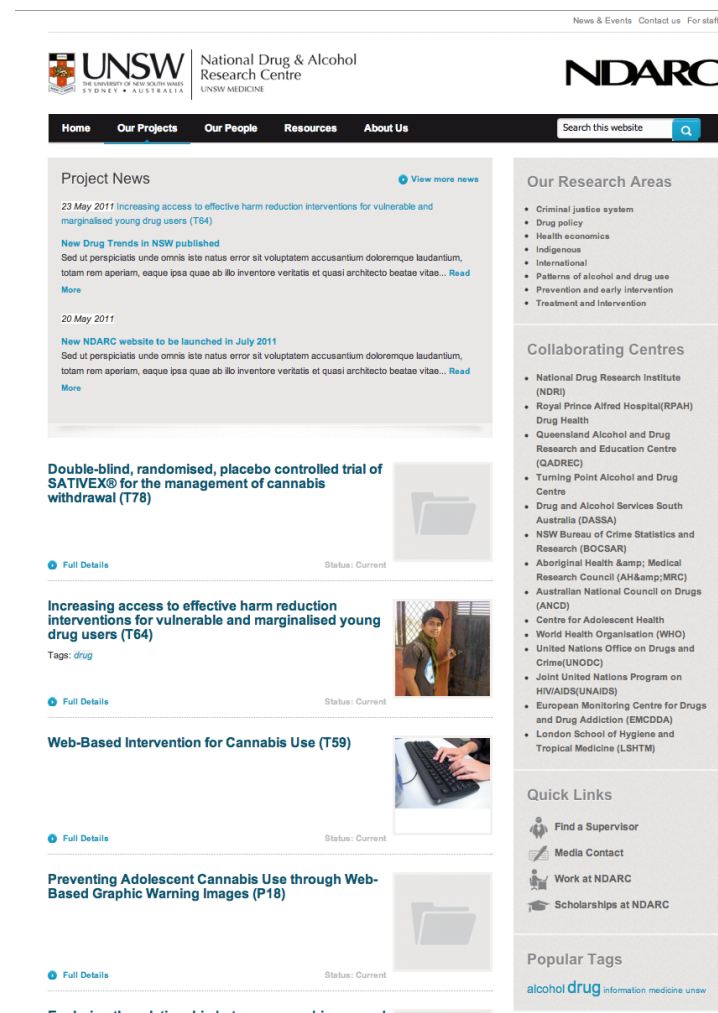

Server Platform and Systems

- Dev, UAT, Production
- Databases, Performance tuning

Research Gateway Integration

Modules...

- Lots... like more than 30...
- Linking elements together (like “my collaborators” or “in the news”)
- Shortcuts (like quick links)
- Social Media and video stuff
- Lots of user-configurable and re-usable cool stuff
- You know... modern-like
- Ok not quite Facebook modern but...
