

The New Observatory  
Learning Space

Anxious to make. Anxious to learn  
Are we learning by doing?

What we have learnt:  
Collaborative educators' training  
Research mobility: practice to academia and  
back to practice  
Documentation and evaluation  
STEAM agenda overflowing the curriculum

What we propose:

- Art-based approach / Creative technology
- Team and collaborators
- Situated learning practice
- Cohesive programme: agendas
- Meaningful and distributed knowledge

FACT

**FACT's learning programme:**

- art centre as an expanded classroom for lifelong learning
- a space for critical dialogues, artistic experiences and social dreaming

## *The Machine to be Another (2017-2018)*

- prototype art-based learning environment using VT
- promote self esteem and motivation as learners and part of a community

## Survival Kits

### *Schools at Lab (2018-2019)*

- educators' training model: art practice and participatory design based methodologies
- free online resources based on the experiences at education institutions

Objects

Instructions

plug them  
and use them

it on  
tounge  
re-activate  
your taste buds

Magnifying glass  
It filters out UV  
light so only normal  
light remains and  
stops your eyes  
being damaged

Cleaning  
Scans the air  
for objects  
an will warn
